

# Ultimate Access™

What if you didn't have to move your data?

## VCINITY DELIVERS

### Unified Data

Vcinity unifies and shares your data regardless of location.

### Connected without Bounds

Vcinity gives you the choice of keeping data in-place or moving it over any distance.

### Speeds that Redefine FAST

When you have to, Vcinity provides unprecedented performance for transferring data across your entire enterprise.

International Data Corporation (IDC) global research shows that 59% of organizations undergoing digital transformation face a “digital deadlock” and remain stuck in the early stages of their transformational journey with legacy infrastructures laden with bottlenecks and dead ends. Legacy architectures have locked data in silos, which limits access to it while complicating its security, management, and protection. This restrains the business’s flexibility in leveraging its own data. ***A new holistic approach to handling enterprise data is required.***

### What if...you didn't have to move your data to use or process it?

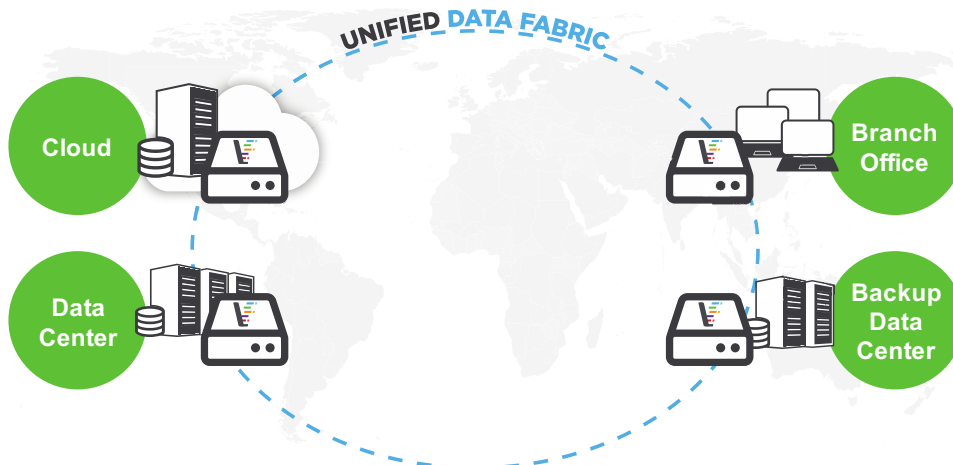

- Work on your files from wherever they are from wherever you are (e.g., work on a file in Mumbai from New York, London or Sydney)
- No more downloading, copying, pre-caching or pre-staging
- No more endless waiting for file transfers

### What if...when you had to move data, you could do it faster than ever?

- Send data across any distance at speed that redefine fast
- No compression, no dedup, no manipulation in any way
- Small files. Large files. Massive files – orchestrate the “what, where, when and why”

### What if...this worked seamlessly with your apps and existing infrastructure?

- No rewriting apps, no extra software
- No network changes, no storage changes
- No need to redo your existing access policy

## What if...you didn't have to surrender your data?

- Keep your data where you want it
- Have a unified view of your data regardless of location
- Have immediate access to the data wherever it is

## Sounds Like Magic?

It's not...With our 32 patents (and growing) to prove it, Vcinity™ allows you to:

- Run apps with compute in one place and data anywhere
- Leverage compute anywhere with data in-place
- Integrate with what you have
- Control it

## Our products offer compelling business value:

- Leverage complete remote datasets in-place for rich insights from analytics/AI/ML
- 50-86% reduction in data copies resulting in substantial cost savings
- 12x improvement in data migration to another data center, colo or cloud
- 5-44x faster data replication across any distance
- Improved data security of data-at-rest and in-transit
- Zero data loss (RPO) with near-zero downtime (RTO)

Vcinity enables various use cases for a variety of enterprise market segments such as media & entertainment, financial services, oil & gas, healthcare and government.

**Ultimate Access to the data you need, at the speed of now.**  
No downloading or sending of files required.
